Hello,

The following submission has been created.

Track Name: AIC2026

Paper ID: 2759

Paper Title: IoT- Based Food Safety And Supply Management: An Integrated Sensor, Precision & Traceability Agriculture Framework

Abstract:

Food Sector is Faced With Several Challenges Every Year in terms of Spoilage, Contamination and Inefficiencies within the supply chain where there is no real time information available. One third of all food Produced for human consumption is either lost or wasted before reaching the customers and nearly 600 million individuals annually suffer from foodborne illnesses. Tradional cold chain management is based on periodic manual tests while traceability relies on paperwork, taking weeks to investigate, and irrigation on farms follows predetermined schedules irrespective of the condition of the soil. In order to overcome this challenge, we propose the framework for integrating IoT in Food Management System Based on three interconnected concepts : (i) Sensor- based cold chain monitoring system - wireless sensors measuring temperature and humidity inside the refrigerator are triggering notifications when predefined thresholds are breached. (ii) Blockchain And RFID for traceability log all the changes and allow wholesale lots to be found within seconds instead of days and finally through. (iii) Smart Agriculture IoT Devices help adjust variable rate irrigation as well as disease detection. The analysis of dozens of papers related to dozens of deployed IoT Systems Reveals that cold chain spoilage rate can be cut down by 30% contamination detection times reduced by 97%, irrigation water savings amount to 30% while using pesticides becomes unnecessary by 25%. This paper discusses the challenges like security vulnerabilities, lack of rural infrastructure, integration costs and lack of interoperable data standards among others.

Last Modified: Wed, 29 Apr 2026 05:26:13 GMT

Authors:

- prathamg9754@gmail.com (Primary)
- gurpreet.1309@chitkara.edu.in

Primary Subject Area: Intelligent Systems (Hardware & Software)

Secondary Subject Areas:

Computational intelligence

Submission Files:

2210990672__Research Paper.docx (42 Kb, Wed, 29 Apr 2026 05:19:47 GMT)

Submission Questions Response:

1. Conflict of Interest
Agreement accepted
2. Status of using third-party material in your article.
I am not using third-party material for which formal permission is required
3. Certificate of originality
Agreement accepted
4. Corresponding Author's Contact number
+91 9779634821
5. Country Name
INDIA
6. Authors Contributions
Pratham Garg-Study conception&design:DataCollection&implementation,analysis&

interpretationofresults;GurpreetSingh-Supervision

7. Conference Rules and Guidelines

Agreement accepted

Thanks,
CMT team.
